## BUGS OR CHOOSE YOUR OWN

When I think of bugs I start to itch. I hate them so much because they creep me out. Anything little that climbs tend to have an uncomfortable thing towards many people. However there are some little bugs that I do like. Ladybugs are so beautiful and great to look at. They're red and have wings, and horses also this myth that if they land on you its good luck. I also like lightning bugs because they're super cool. The yellow or look-a-like that they do every couple of seconds. They bring light out on a dark day. In fact one of my favorite songs is called fireflies. Its so relaxing and interesting to look at. All these patterns in the seconds and how high and low they can fly. Its like they aren't scared of anything. So there is difference in bugs some I really like and some I don't like. Bees are a danger zone for me. At the end of the day they make the world a better place.
