

Free Write: Feminism

Free Write

November 19, 2018

§ FEMINISM §

Feminism: the advocacy of women's rights on the basis of the equality of the sexes. Feminism is a range of political movements, ideologies, and social movements that share a common goal: to establish, define and achieve economic, political, ~~personal~~ personal, and social equality of sexes. Its crazy how once we knew what to write about in free write, feminism I was like, I'm about to write a whole novel, but when I actually started writing I got stuck. It was like I had so many things to say that my mind went blank and couldn't analyze everything that was going on in my head. I had so much to say that I didn't even know where to start. That's how much feminism is important/powerful to me and I found it so very and interesting.
