MUSIC

My favorite thing in the world is Music. The beats, background noise, lyrics the meaning of every song or no meaning... It makes me super happy. There are so many different types of Music for everyone's different taste. Mine is R&B, and New York vibes. R&B is a genre of music that's chill and smooth. Alessia Cara, Khalid, Summer, H.E.R, Bryson, and many more are my favorites. Their music makes me want to just lay back and chill and do homework or clean my room. It makes me calm and I listen to them everyday. However, New York vibes is my made up category, it's music that all New Yorkers should know... like Bixie, A Boogie wit da Hoodie, Nicki Minaj, Jay Critch, Cardi B... All of their songs were born in New York and all of the people who live here should know and sing along whether in a car, function or in the street. Both of these categories to me bring people together and that's what music is supposed to do. That's why we love every type of music and yes there are many other reasons to it...
